List of type-error (T), compilation (C) and numerical (N) bug uncovered by testing. The list of type-error bugs are categorized by the number of *nested* operators needed to discover the bug, the cause of the bug, description, and testing source. Code generation issue for FEM code (CG), issue with other field structure (OF), translation between other field and code generation (TF),

FC1 Code generation issue when converting types
$|(\nabla(F0))|$;

```
ex1.cxx:798:16: error: no viable conversion from 'ex1::tensor_ref_2' to 'double'

FN2 Numerical error when taking the norm. Possible mistake causes from mini-merge and new operators. $normalize(\nabla(F0))$ also norm(hessian)

FC3 Can not take inner-product of fields with different continuity.

```
Type error (adding ofields-check typechecker)
